

amino5

Description

A food for special medical purposes.

GA amino5 is a powdered Lysine free, low tryptophan amino acid supplement

Indications

For use in the dietary management of Glutaric Aciduria Type 1 (GA1) from 3 years onwards..

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight and medical condition of the patient.

Preparation Guidelines

To be determined by the clinician or dietitian. May be used in the dietary management of GA1 in a variety of ways:

- Mixed in with protein substitute
- Added to modular feeds.
- Incorporated into other permitted food or drink.

GA amino5 (6g) = 5g PE

IMPORTANT NOTICE

Must only be given to patients with proven Glutaric Aciduria Type 1 (GA1) under strict medical supervision.

Suitable from 3 years onwards

Diet must be supplemented with natural protein, water and other nutrients in prescribed quantities to supply lysine, tryptophan, fluid and general nutrition requirements.

Not for use as a sole source of nutrition.

For enteral use only.
